

Parsing Composed Grammars with Language Boxes

Lukas Diekmann & Laurence Tratt

Software Development Team

2013-08-24

Our problem

Titian: Sisyphus

Our problem

Titian: Sisyphus

Designing a perfect programming language

We want **better** programming languages

We want **better** programming languages

But better always seems to end up **bigger**

A solution?

Titian: Pesaro Madonna

A solution?

Titian: Pesaro Madonna

Language composition as salvation?

Language composition
△
mixing languages together

Language composition

Here and now

Roadmap

Roadmap

Should be easy

- **LR**
- **Earley**
- **PEG**

- **LR** composition undefined (in general).
- **Earley**
- **PEG**

- **LR** composition undefined (in general).
- **Earley** composition ambiguous (in general).
- **PEG**

- **LR** composition undefined (in general).
- **Earley** composition ambiguous (in general).
- **PEG** composition can shadow (in general).

The only choice?

SDE

Challenge:
SDE's power +
a text editor feel?

Demo

Summary

Designing a perfect programming language

Summary

Language composition as salvation?

Parsing: problematic

Parsing: problematic

SDE: intolerable

Incremental parsing + language boxes

Incremental parsing +
language boxes

Feel of traditional text editing +
SDE-like functionality
